BACKGROUND

Systems-oriented Software Engineer with experience in maintaining, deploying, and supporting production systems and applications. Skilled in backend services, server-side logic, and database management, with hands-on experience in troubleshooting live environments, optimizing performance, and ensuring system reliability.

Background in game systems and web platforms strengthened real-time debugging, incident resolution, and system monitoring skills. Strong communicator with teaching experience, capable of documenting processes and supporting users effectively.

Skills

System Monitoring & Troubleshooting	Windows/Linux Environment Familiarity	Database Management (MySQL, Firebase)	Performance Optimization	Version Control
Incident Response & Debugging	Web Systems (Laravel, NextJS, Node.js)	API Integration & Maintenance	Documentation & Knowledge Sharing	Client Communication & Support

RELEVANT EXPERIENCES

The CMD Studios — **Malate, Manila**
Game Developer — **July 2024 - Current**

Contributed to the development of *Fallen Tear: The Ascension*, implementing gameplay systems with a focus on performance, responsiveness, and maintainable architecture.

- Monitored and debugged real-time gameplay systems, identifying and resolving performance and logic issues in production builds
- Implemented and maintained system-level features such as quest flows, combat logic, and event triggers
- Designed modular and reusable systems to support scalable content development
- Investigated and resolved runtime issues, improving system responsiveness and user experience
- Collaborated with cross-functional teams to troubleshoot and fix system-related bugs
- Documented system behaviors and workflows for internal use

GEM Code IT Solutions — **Lipa City, Batangas**
Backend Developer — **March 2023 – July 2025**

Co-founded and developed client-based web applications, handling the full development lifecycle from planning and system design to deployment.

- Maintained backend services and APIs used in live client applications
- Monitored application performance and resolved system issues in production environments
- Managed databases (MySQL, Firebase), including optimization and data integrity checks
- Deployed and tested applications, ensuring uptime and reliability
- Troubleshot integration issues between frontend and backend systems
- Assisted in system architecture planning and backend infrastructure setup

STI College Lipa — **Lipa City, Batangas**
IT Instructor — **August 2024 – December 2024**

- Taught Event-Driven Programming (C#) and Data Structures and Algorithms (Python) with a focus on practical, hands-on development
- Guided students in building responsive applications, emphasizing event handling and core programming concepts

Commission on Higher Education Regional Office IV — **Lipa City, Batangas**
Software Engineering Intern — **February - May 2024**

- Developed the Voyage Information System and Document Tracking System within a 486-hour software engineering internship.
- Supported MIS operations and assisted in daily administrative tasks, including logistics for office events such as managing sound systems and presentation materials to ensure smooth program flow.

EDUCATION

STI College Lipa — Lipa City, Batangas
BS in Information Technology, Magna Cum Laude — August 2024
